

I Found An Angel In Your Eyes

Words & Music by Joe LaMay

I found an angel in your eyes
You really came through bright and clear
It nearly took me by surprise
But I cast aside all fear
And when the songs were done and the lights were turned down low
I held you warm and near
I knew I'd have to let you go
And I'd be wishing you were here

I've got an angel on my mind
And that's where you're gonna stay
'Cause it's been too long a time
Since I have felt this way
And if I could fly over mountains and the sky
I could make you reappear
But it's not my place to try
I'm just wishing you were here

*And when I'm on this road I travel
You'll be right there in my heart
Should my life start to unravel
Please don't let me fall apart*

I know that angels seldom stray
They walk a path that's straight and true
But if you're ever back this way
We'll be in heaven - me and you
And when the day is done and the lights are turned down low
And I feel you drawing near
Although I know it can't be so
I'm just wishing you were here
